

## Klima-Newsletter #5

Dear sustainability enthusiasts,

welcome to the 4th edition of this newsletter published in the context of the climate protection project. Here, we report in more or less periodical intervals about the progress of the project and other news from the sustainability cosmos of the university.

### Mobility survey

Currently, a mobility survey is carried out. This way, we want to determine the emissions for the area of every day mobility in 2022 and create a data basis, to develop well aimed measures for sustainable and climate friendly mobility behaviour. The survey addresses students and staff members of the university and can be accessed via [this link](#) in the intranet. We would be delighted if you could participate.

### NOW

On Thursday, May 19 at 7 pm, we show the movie NOW, directed by Jim Rakete. The event takes place in lecture hall 1 in A14, entry is free of charge. The event addresses mainly students, but everyone is welcome as well. In the movie, several climate activists are presented and interviewed. We also invited Olympic athlete and climate activist Carlotta Nwajide, to speak about her commitment and activism before the movie. The link to the event and trailer for the movie can be found [on the website](#) of our cooperation partner, the student cinema Gegenlicht. Feel free to come by.

### Event Scientists for future

With the title *containment of climate change – what to do?*, the local group of Scientists for future offers a panel discussion on Friday, May 13 at 3 pm in the BIS-Saal of the University. There, the results of the latest IPCC report are discussed by different scientists. You can find more information about the event [here](#).

### Think Act Change

The future and sustainability conference NachDenkstatt, fully organised and run by a student initiative, has already acquired a good reputation in the sustainability scene. From today on, you can sign up for the event on June 10-12. Together with a poetry slam taken in place at Gleispark, you have access to a wide-ranging workshop offer around topics like mobility transition, greenwashing to sustainably city project. [Sign up here](#).

### Echo carbon accounting

As already reported in the last newsletter, the university has published a greenhouse gas balance. We are happy that the topic is picked up in the current edition of UNI-INFO. The article offers a condensed insight in the results, you can find it [here](#). The GHG balance in depth is, of course, still available [here](#).

We are ongoingly happy to hear your ideas, suggestions and wished – please feel free to write us anytime.

It would be so great, if you forward this newsletter to your colleagues or recommend signing up to it.

Enjoy the month of May, despite everything, and even more so.
